# Insulated Tools – Classic

 1000 V

## Features:

**Integral guards** help prevent hand contact with conductive parts.

**Thick, exceptionally tough, high-dielectric white inner coating is bonded to the tool.**

**Induction hardened** cutting knives for long life.

**Forged steel handle.**

**Hot-riveted joint** ensures smooth action and no handle wobble.

**A flame retardant, impact-resistant, bright orange outer coating.**

 1000 V

All Classic Klein insulated tools comply with ASTM F-1505 and IEC 60900-2004 standards for insulated tools and are clearly marked with the official international 1000-volt rating symbol. Not all tools with plastic coatings or plastic handles provide protection against electrical shock. The large, bright orange handles make the tool comfortable to use all day and easy to identify in the field. **Only use those tools that are marked with the official international 1000-volt rating symbol, as shown, if there is any chance that the tool will make contact with an energized source. Product numbers with the INS suffix contain these warnings and must be understood.**

**⚠️WARNING:** Only use tools that are marked with the official international 1000-volt rating symbol shown below, if there is any chance that the tools will make contact with an energized source.  1000 V

**⚠️WARNING:** Do NOT touch uninsulated portion of the tool or any conductive object when either might contact an energized source.

**⚠️WARNING:** Wear approved eye protection. Always inspect your tools before use. Do not use if orange coating cracks, breaks or becomes damaged. Destroy tool if white layer shows through orange layer.

**⚠️WARNING:** Whenever possible, always de-energize lines and equipment prior to working on or around them. Klein insulated tools are designed only to reduce the chance of injury where the tool may make contact with an energized source.

**⚠️WARNING:** Because moisture, films, or other surface contaminants are conductive, Klein insulated tools must be kept clean, dry, and free of any surface contaminants.

## Insulated High-Leverage Side-Cutting Pliers

### Additional Features:

- High-leverage design provides 46% greater cutting and gripping power than other plier designs.
- Streamlined design with sure-gripping, cross-hatched knurled jaws.

# Electrician's Insulated Tools

## Features:

**Durable, three component molded insulation** provides protection against electric shock.

**Thick, exceptionally tough, high-dielectric white inner coating is bonded to the tool.**

**Custom, US-made tool steel.**

**Forged steel handle.**

**Induction hardened cutting knives** for long life.

**Hot-riveted joint** ensures smooth action and no handle wobble.

**Multi-color, sleek design with small thumb guards** for ease of handling and storage.

**A flame retardant, impact-resistant, multi-color outer coating.**

**Klein electrician's insulated tools meet or exceed IEC 60900: 2012, ASTM F1505, and VDE standards.**

They are clearly marked with the official 1000-volt rating symbol.

The Electrician's line of insulated tools provides a multi-color, sleeker design than the Classic Lineman's insulated tools. 1000V rated and individually tested to conform to ASTM F1505, IEC 60900. EINS tools have passed VDE third party testing certification to the IEC 60900 standard. This line of tools provides the everyday protection the electrician needs in a compact, lightweight design.

Catalog numbers for Klein electrician's insulated tools have the suffix "EINS" and are marked with the official international 1000-volt rating symbol. Not all tools with plastic coatings or plastic handles provide protection against electrical shock. **Only use those tools that are marked with the official international 1000-volt rating symbol, as shown, if there is any chance that the tool will make contact with an energized source. Product numbers with the EINS suffix contain these warnings below and must be understood.**

**⚠️WARNING:** Only use tools that are marked with the official international 1000-volt rating symbol shown below, if there is any chance that the tools will make contact with an energized source. **1000 V**

**⚠️WARNING:** Do NOT touch uninsulated portion of the tool or any conductive object when either might contact an energized source.

**⚠️WARNING:** Wear approved eye protection. Always inspect your tools before use. Do not use if orange coating cracks, breaks or becomes damaged. Destroy tool if white layer shows through orange layer.

**⚠️WARNING:** Whenever possible, always de-energize lines and equipment prior to working on or around them. Klein insulated tools are designed only to reduce the chance of injury where the tool may make contact with an energized source.

**⚠️WARNING:** Because moisture, films, or other surface contaminants are conductive, Klein insulated tools must be kept clean, dry, and free of any surface contaminants.

# Insulated Screwdrivers and Nut Drivers

 1000 V

## Features:

 1000 V

Klein insulated tools meet or exceed the IEC 60900 and ASTM F1505 standards, for insulated tools, and are clearly marked with the official 1000-volt rating symbol.

**Hollow shafts** make it possible to work on stacked circuit boards or other long bolt applications.

**Custom, US-made tool steel.**

**Thick, exceptionally tough, high-dielectric white inner coating** is bonded to the tool.

**Durable, two layer, molded insulation.**

**Bright orange outer coating** is flame and impact resistant.

**Cushion-Grip handles** for greater torque and comfort.

**Tip-Ident®** quickly identifies nut driver size.

**⚠️WARNING:** Only use tools that are marked with the official international 1000-volt rating symbol shown below, if there is any chance that the tools will make contact with an energized source.

**⚠️WARNING:** Wear approved eye protection. Always inspect your tools before use. Do not use if orange coating cracks, breaks or becomes damaged. Destroy tool if white layer shows through orange layer.

**Product numbers with the EINS suffix contain these warnings and must be understood.**

**⚠️WARNING:** Do NOT touch uninsulated portion of the tool or any conductive object when either might contact an energized source.

**⚠️WARNING:** Whenever possible, always de-energize lines and equipment prior to working on or around them. Klein insulated tools are designed only to reduce the chance of injury where the tool may make contact with an energized source.

**⚠️WARNING:** Because moisture, films, or other surface contaminants are conductive, Klein insulated tools must be kept clean, dry, and free of any surface contaminants.
